**Trigital and Cine-tal build monitoring solutions for TV3, the primary television channel of Catalan public broadcaster Televisió de Catalunya, a subsidiary of the CCRTV.**

*With a focus on colour management and monitor calibration TV-3 uses Cine-tal products in OB production, post and QC.*

INDIANAPOLIS, December 6, 2010 - Cine-tal Systems, a developer of image monitoring and colour management solutions and Trigital have completed the installation of monitoring systems for TV-3. “Our technology focuses monitoring, colour management and display processing for colour critical applications in production, post and distribution” said Rob Carroll, CEO of Cine-tal.

At the heart of TV-3’s colour critical monitoring applications is the Cinemage 2000 and the Cinemage B Series product lines from Cine-tal. These products include the cineSpace colour management technology for accurate calibration.

### **About Trigital**

Trigital, a company founded in 1996, integrates a staff who combines commitment and honesty with a wide experience in selling and integrating professional solutions in the animation, video postproduction and digital intermediate markets. Trigital offers high quality services and products aiming to fully satisfy the needs of the audiovisual industry where technology changes constantly. Trigital has specialized in implementing complete solutions for editing and finishing, compositing and VFX, stereoscopic 3D, 3D animation, film scanning, color grading, restoration, monitoring and signal testing, storage and data infrastructure, and video encoding. Trigital is the local representative of many of the main and most successful manufacturers and developers of the market. Among their customers are the most important film labs, animation studios, postproduction companies, training centers and videogames developers of the spanish market.
